# Creating Configuration Manager Map

In this post, I will show you how to create Configuration Manager Map within Home lab environment. I download this program from internet. Just google.

Install the application with default setting and open the program from

CMMap — Confirm Installation

The installer is ready to install CMMap on your computer.

Click "Next" to start the installation.

Cancel | < Back | Next >

CMMap — Installation Complete

CMMap has been successfully installed.

Click "Close" to exit.

Please use Windows Update to check for any critical updates to the .NET Framework.
