### Features included in update pack

This update pack includes the following features. Select the features you want to enable now. Features you don't enable now can be enabled later from the Updates and Servicing node of the Configuration Manager console.

- BitLocker Management
  - Conditional access for managed PCs
  - VPN for Windows 10
  - PFX Create
  - Approve application requests for users per device
  - Create and run scripts
  - Enable third party update support on clients
  - Device Health Attestation assessment for compliance policies for conditional access
  - Package Conversion Manager
  - Windows Defender Exploit Guard policy

Description:

Ability to manage BitLocker Drive Encryption.

### Client Update Settings

This update includes an update for the Configuration Manager client. You can upgrade your clients immediately, or validate this client in a pre-production collection before you upgrade all your Configuration Manager clients.

Upgrade without validating

Overwrites your current Configuration Manager client package with the new client update. All new client installations and client upgrades use this new client update.

Validate in pre-production collection

Validate the client update on members of the pre-production collection while you keep your production client package intact. Later, you can overwrite the production package using Client Update Options in the Updates and Servicing node of the Configuration Manager console.

Pre-production collection:
