

Installing KB4535819 – Current Branch 1910

In this post, I will show you the steps for installing above KB. The KB was released on 17th Dec to General Public. It will show up in the console.

The screenshot shows the Configuration Manager console interface. At the top, there is a ribbon with various actions like History, Check for updates, Refresh, Saved Searches, Install Update Pack, Run prerequisite check, Retry installation, Ignore prerequisite warnings, Promote Pre-production Client, and Download. Below the ribbon, the console tree shows 'Administration' > 'Updates and Servicing' selected. The main pane displays a table of updates:

Name	Date Released	State	Prereq Only	Ignore Prereq Warning	Full Version	Client Version	Last Update Time
Configuration...	17-Dec-2019 4:00 PM	Ready to install	No	No	5.00.8913.1012	5.00.8913.1012	24-Dec-2019 2:04 AM

Below the table, the 'Configuration Manager Updates Wizard' is open, showing the 'General' tab. The wizard title is 'Configuration Manager 1910 Hotfix (KB4535819)'. The text reads: 'This wizard helps you configure and install this update.' with a link to 'Learn more'. Under 'This version includes:', it lists: 'Configuration Manager site server updates', 'Configuration Manager console updates', and 'Configuration Manager client updates'. Under 'Prerequisite warnings:', there is a checked checkbox for 'Ignore any prerequisite check warnings and install this update regardless of missing requirements.' and a link to 'Privacy Statement'. At the bottom, there are navigation buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Client Update Settings

This update includes an update for the Configuration Manager client. You can upgrade your clients immediately, or validate this client in a pre-production collection before you upgrade all your Configuration Manager clients.

Upgrade without validating

Overwrites your current Configuration Manager client package with the new client update. All new client installations and client upgrades use this new client update.

Validate in pre-production collection

Validate the client update on members of the pre-production collection while you keep your production client package intact. Later, you can overwrite the production package using Client Update Options in the Updates and Servicing node of the Configuration Manager console.

Pre-production collection:

Name	Date Released	State	Prereq Only	Ignore Prereq Warning	Full Version	Client Version	Last Update Time
Configuration Manager 1910 Hotfix (KB4535819)	17-Dec-2019 4:00 PM	Installed	No	Yes	5.00.8913.1012	5.00.8913.1012	28-Dec-2019 9:02 AM

The below client version 8913.1012 will be upgraded within 1 day. In production it will be as per company guideline.

This KB is only for those who installed CK1910 using fast ring script. If you installed using slow ring then you will not see this KB in the console.

Following are the fixes within this KB.

<https://support.microsoft.com/fi-fi/help/4535819/update-for-microsoft-endpoint-configuration-manager-version-1910-early>

This concludes KB install.

Thanks
