# WIMWITCH V2.0.1 Install with Current Branch 2002 Integration

I downloaded older version of WIMWitch in Oct 2019. If you want this file email ram@ramlan.ca

To update newer version – Run below command in PowerShell – C:\Users\Administrator\Downloads

save-script -name WIMWitch -path c:\wimwitch -force

Once the update is successful, we can run PowerShell command from C:\WIMWitch folder

For rest of the instruction just follow the screen shots.

Click Select – Browse to Windows 10 ISO.

WIM Witch - v2.0.1

Source WIM	Update Catalog	Customizations	App Removal	ConfigMgr	Make It So
Import WIM + .Net	Import LP+FOD	Pause + Scripts	Drivers	Autopilot	Save/Load

Select a Windows 10 ISO:

ISO to import from...   [Select]

Select the item(s) to import:
☐ Install.wim
☐ .Net Binaries

New name for the imported WIM:

Name for the imported WIM   [Import]

WIM Witch - v2.0.1

Source WIM	Update Catalog	Customizations	App Removal	ConfigMgr	Make It So
Import WIM + .Net	Import LP+FOD	Pause + Scripts	Drivers	Autopilot	Save/Load

Select a Windows 10 ISO:

Z:\Trekstor Backup Jul 2017\Softwares\Operating Systems\Ten\en_windows_10_business_editic   [Select]

Select the item(s) to import:
☑ Install.wim
☑ .Net Binaries

New name for the imported WIM:

Windows 10 v1909 x64   [Import]

I don't have anything to import for Language Pack and Feature on Demand

WIM Witch - v2.0.1

Source WIM	Update Catalog	Customizations	App Removal	ConfigMgr	Make It So
Import WIM + .Net	Import LP+FOD	Pause + Scripts	Drivers	Autopilot	Save/Load

Object Type

Windows OS

Version

path to source   Select

Selected items
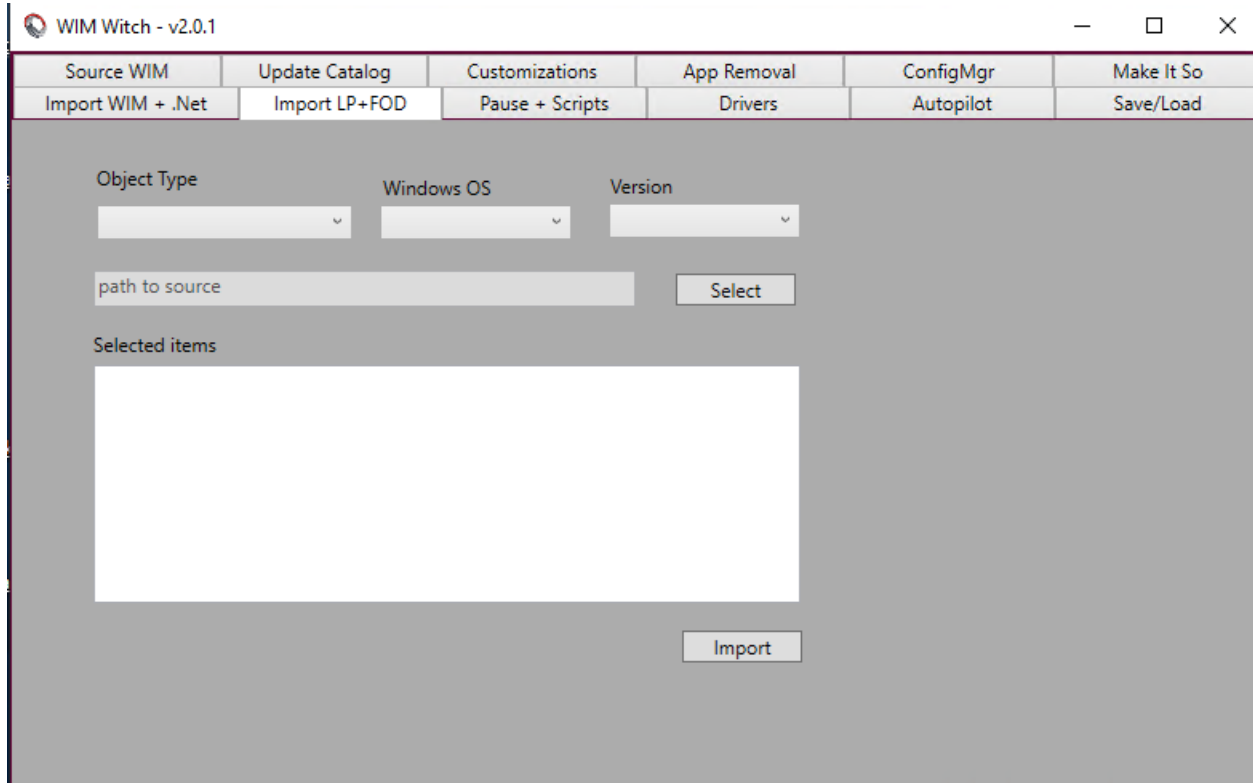

Import

Don't have any script to pause during the process

WIM Witch - v2.0.1

Source WIM	Update Catalog	Customizations	App Removal	ConfigMgr	Make It So
Import WIM + .Net	Import LP+FOD	Pause + Scripts	Drivers	Autopilot	Save/Load

☐ Pause after mounting

☐ Pause before dismounting

☐ Run Script

PowerShell Script   Select

Parameters
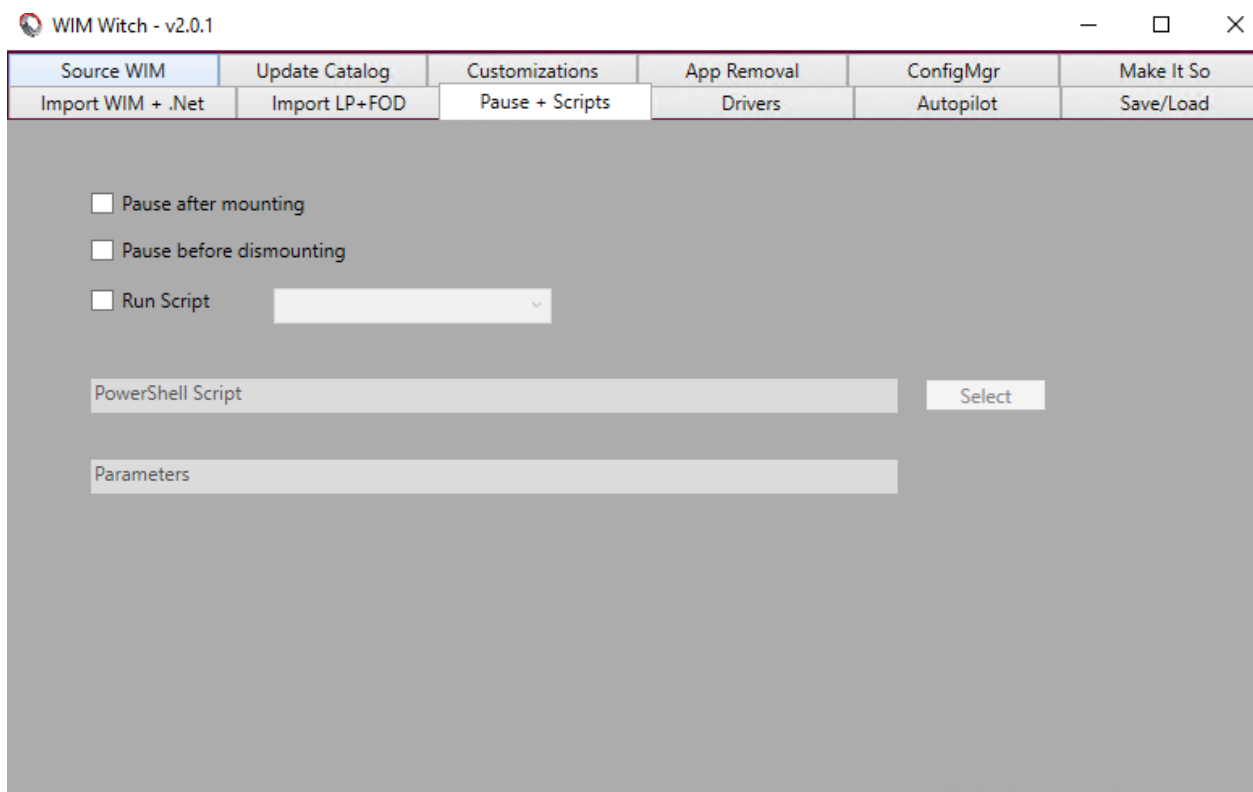

Don't have any drivers to inject during the process

WIM Witch - v2.0.1   —   □   ✕

| Source WIM | Update Catalog | Customizations | App Removal | ConfigMgr | Make It So |
| Import WIM + .Net | Import LP+FOD | Pause + Scripts | Drivers | Autopilot | Save/Load |

Select the path to the driver source(s) that contains the drivers
that will be injected.

☐ Enable Driver Injection

Driver Source

Select Driver Source Folder	Select
Select Driver Source Folder	Select
Select Driver Source Folder	Select
Select Driver Source Folder	Select
Select Driver Source Folder	Select

I am not using Autopilot yet

WIM Witch - v2.0.1   —   □   ✕

| Source WIM | Update Catalog | Customizations | App Removal | ConfigMgr | Make It So |
| Import WIM + .Net | Import LP+FOD | Pause + Scripts | Drivers | Autopilot | Save/Load |

Select a JSON file for use in deploying Autopilot systems. The file
will be copied to processing folder during the build

☐ Enable Autopilot

Source JSON

Select JSON File

ZTD ID#   Select JSON File...   Select

Tenant Name   Select JSON File...
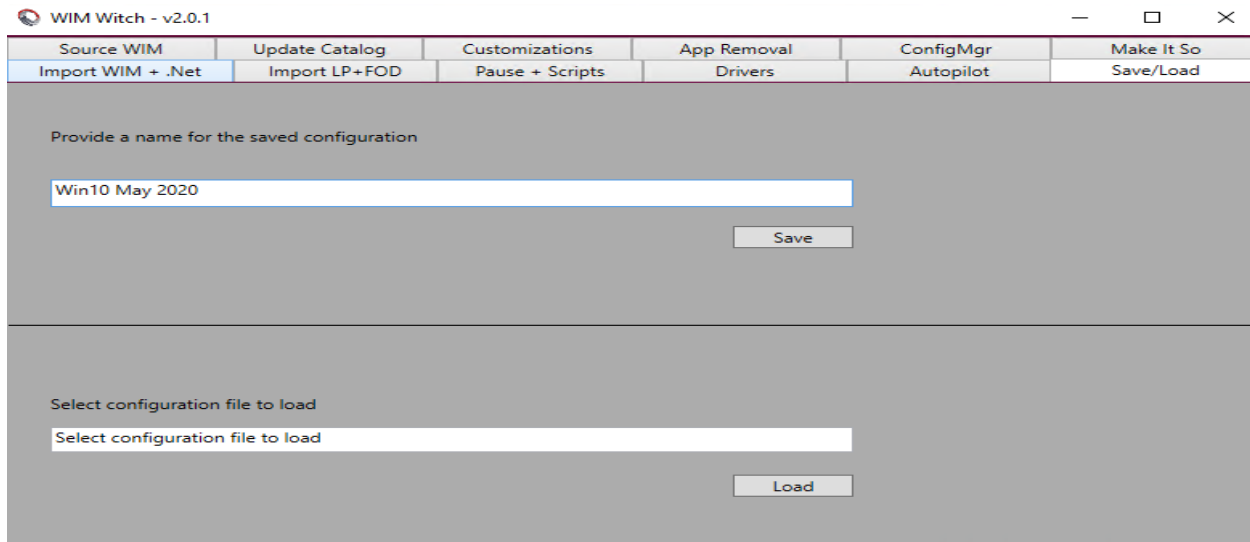

Deployment Profile Select JSON File...

To download a new Autopilot profile from Intune, click select   Retrieve Profile
to choose the folder to save the file to. Then click Retrieve
Profile.

Path to save file:
C:\WimWitch\Autopilot

                                                          Select

Type name for this process and click save. If we need to update anything for this WIM we can load the configuration file later.

WIM Witch - v2.0.1					— □ ✕
