

How to use community hub within Current Branch 2002

Community Hub feature is out with CB2002. Here is the screen shot. Please note the console should be installed on Windows 10 with .Net 4.6

Unable to load the Configuration Manager Community Hub

Thank you for your interest in the Community Hub. Ensure your machine has the following prerequisites:

- Windows 10 version 17110 or higher
- .net Framework version 4.6 or higher

Semi-Annual Channel

Version	Servicing option	Availability date	OS build	Latest revision date	End of service: Home, Pro, Pro Education, Pro for Workstations and IoT Core	End of service: Enterprise, Education and IoT Enterprise
2004	Semi-Annual Channel	2020-05-27	19041.331	2020-06-18	2021-12-14	2021-12-14

You can check script status (success or failure) from here

Pretty easy to deploy scripts created by various MVP made available within Community Hub. A useful and great feature from Config Mgr Community.

Thanks
