

RVTools 4.0.6 to manage vSphere/vCenter Infrastructure

I came across this tool from the community which is very useful for managing VMWare infrastructure, if you don't have access to host or vCenter. <https://www.robware.net/rvtools/>

Run the MSI and accept default settings.

Select Installation Folder

The installer will install RVTools to the following folder.

To install in this folder, click "Next". To install to a different folder, enter it below or click "Browse".

Folder:

C:\Program Files (x86)\Robware\RVTools\

Browse...

Disk Cost...

Install RVTools for yourself, or for anyone who uses this computer:

Everyone

Just me

Cancel

< Back

Next >

Confirm Installation

The installer is ready to install RVTools on your computer.

Click "Next" to start the installation.

Cancel

< Back

Next >

Installation Complete

RVTools has been successfully installed.

Click "Close" to exit.

Please use Windows Update to check for any critical updates to the .NET Framework.
