

# How to remove or uninstall Operations Manager 2019

In this post, I will show you the steps to remove or uninstall OpsManager 2019. It is pretty easy and straight forward. You can start the process from Control Panel – Program and Features – Select System Center Operations Manager – Uninstall

Before you start the process make sure to remove monitoring agent from workstation/servers. You can remove the agent from Control Panel or from Operations Manager Console. I prefer removing the agent from workstation/servers manually.

Restart the server to be on the safe side.

## How to remove Monitoring Agent from workstation/server

Control Panel Home

Uninstall or change a program

To uninstall a program, select it from the list and then click Uninstall, Change, or Repair.

View installed updates

Turn Windows features on or off

Install a program from the network

Organize ▾ Uninstall Change
