How to upgrade Current Branch 2010 to Current Branch 2103

I am currently running CB2010. In this post, we will install CB2103 released today.

since 1910 – now called Microsoft Endpoint Configuration Manager (MEMCM). This post is a complete step-by-step SCCM 2103 upgrade guide, meaning that if you want to upgrade your existing SCCM/MEMCM installation to the latest SCCM/MEMCM updates, this post is for you.

More about this release here - <u>https://techcommunity.microsoft.com/t5/configuration-manager-blog/update-2103-for-microsoft-endpoint-configuration-manager-current/ba-p/2251517</u>

https://docs.microsoft.com/en-us/mem/configmgr/core/plan-design/changes/whats-new-in-version-2103

https://docs.microsoft.com/en-us/mem/configmgr/apps/deploy-use/disable-delete-deployments

SCCM 2002 is the latest baseline version. This means that if you're downloading the source from Volume Licensing, SCCM 2002 will be the starting version of your new SCCM site. Once a new server is built using 2002, you can upgrade to the latest 2103 version after.

Support for Current Branch:

Early Update Ring

At the time of this writing, SCCM 2103 is available in the Early update ring. Ye cover that in the Installation section.	ou must run the opt-in script to see it appear in the console. We'll
