

# Installing Windows 11 Insider Preview v22449.1000 – Pre Release

In this post, I am going to install above version. I have been running Windows 11 for 2 months so far. I like it and there are many changes compared to Win 10.

To install above version, you should have participated in Windows insider program to get the updates. I joined the program a while ago. I believe, I wrote a blog on how to join insider program few months ago. Check that out if you need more info.

Click Start – Settings – Windows update – After few minutes you will see the preview release will download.

Wait for the update to pull above version and it is fully automated.

**Windows Update**

 **Restart required (estimate: 5 min)**  
Your device will restart outside of active hours.
