

ApexSQLSearch Install

I was trying to install above free add-on for Management and Visual Studio. When I ran the installer I was getting error message please install Management Studio or Visual Studio to install this add-on. I have those installed already yet ApexSQL Search cannot be installed on Windows 10 x64 22H2 machine.

I wanted to test the same at home lab which is running Management Studio 18 on Windows Server 2022. I was able to start the install. Here are the screen shot.

I downloaded FREE version from here <https://apexsql-search.software.informer.com/download/>

Setup

Where should ApexSQL Search be installed?

Setup will install ApexSQL Search into the following folder:

C:\Program Files\ApexSQL\ApexSQL Search

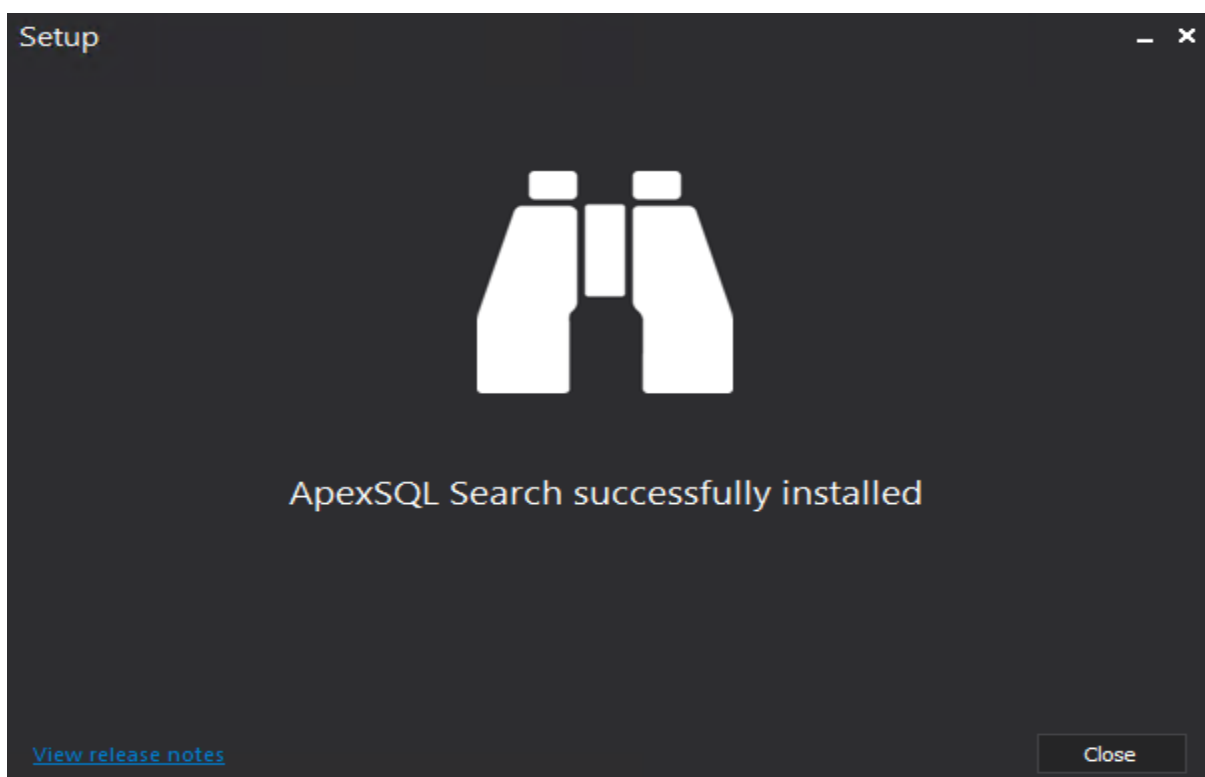

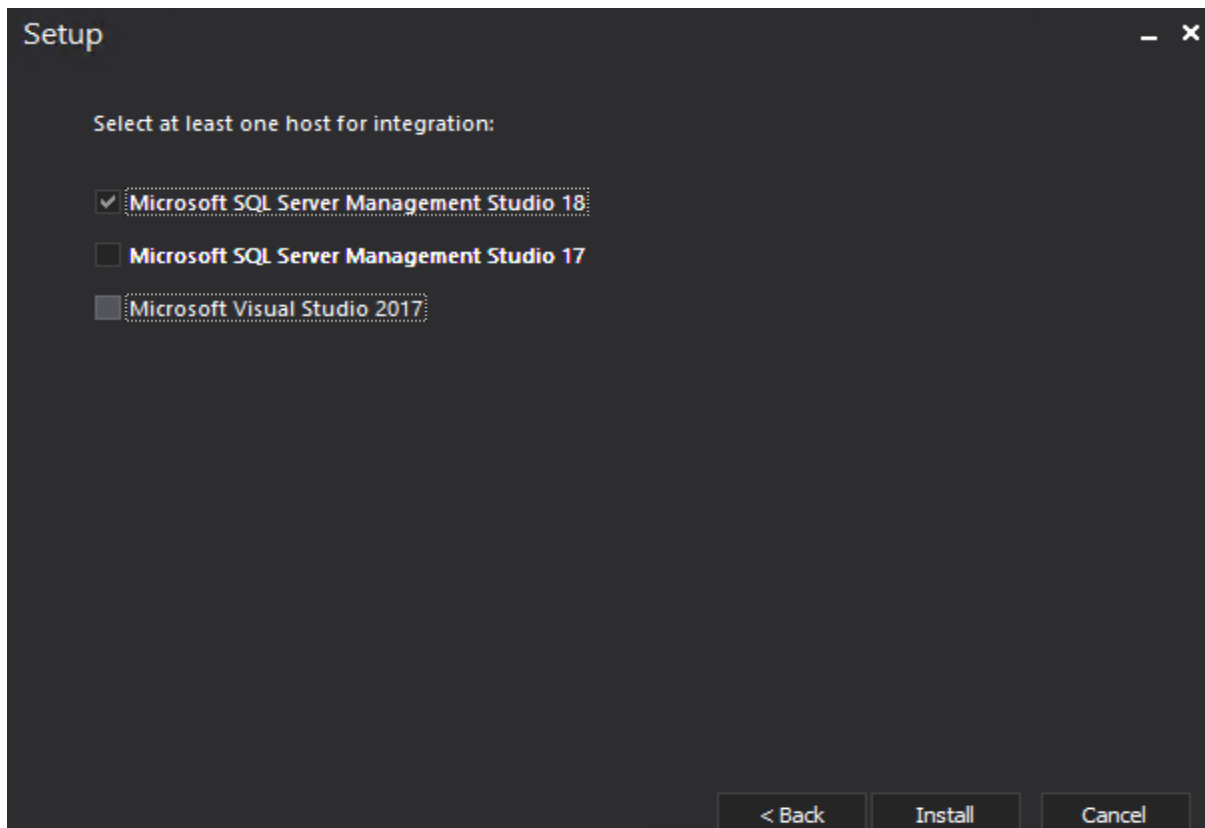

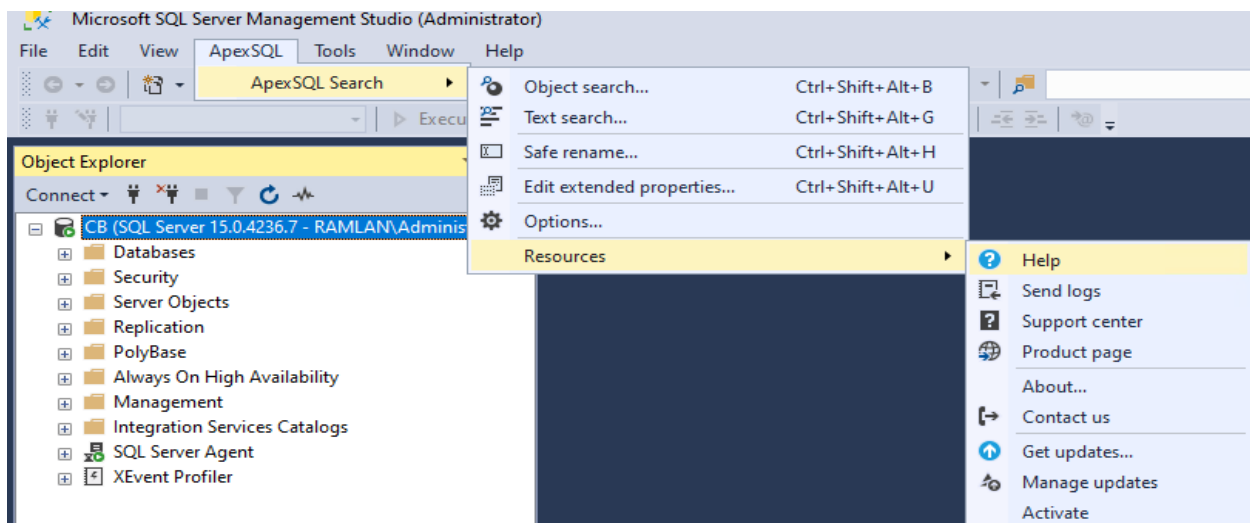

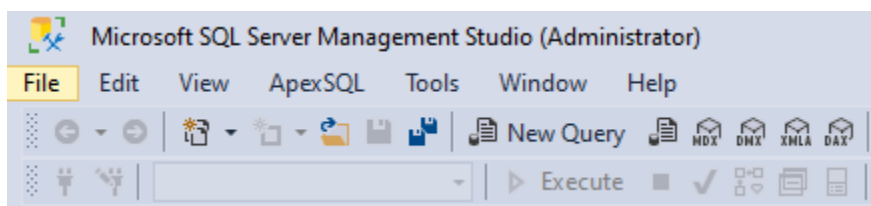

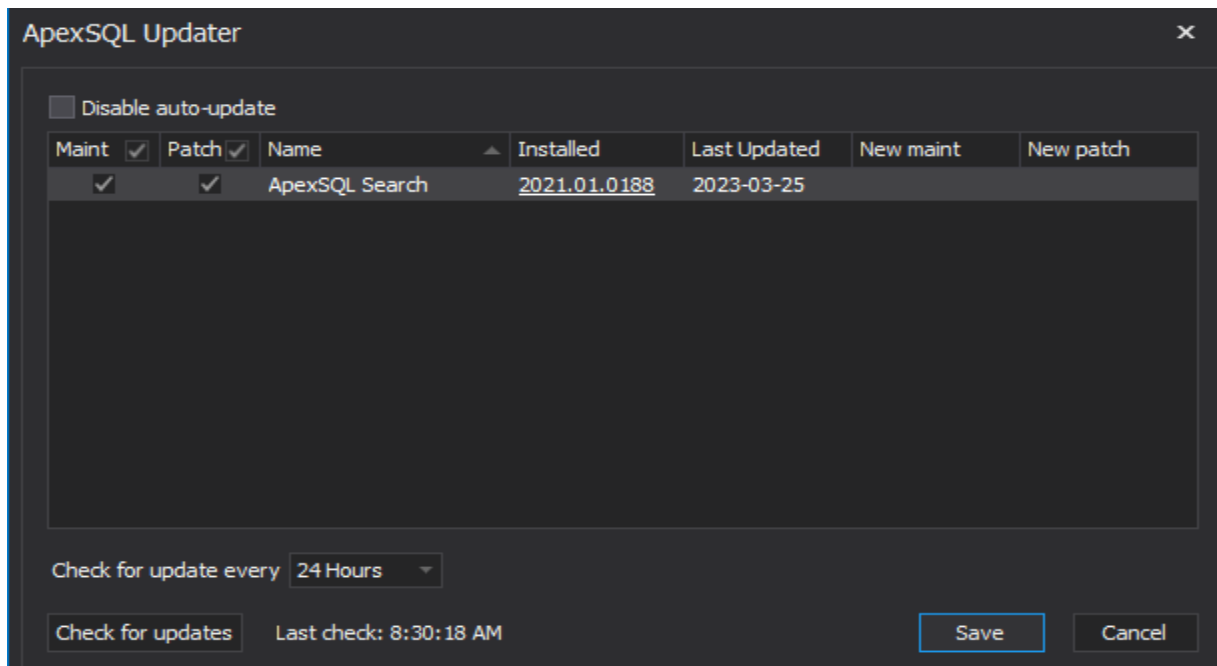

At least 109.0 MB of free disk space required

So it is working on Windows Server 2022. Not sure why the install won't start on Windows 10 x64 22H2. Need more research.

Thanks
