# How to use Content Library Explorer Tool on Current Branch 1810

If you want to clean up your distribution point on Current Branch 1810 or on Secondary Site Distribution Point, this tool will be of great help.
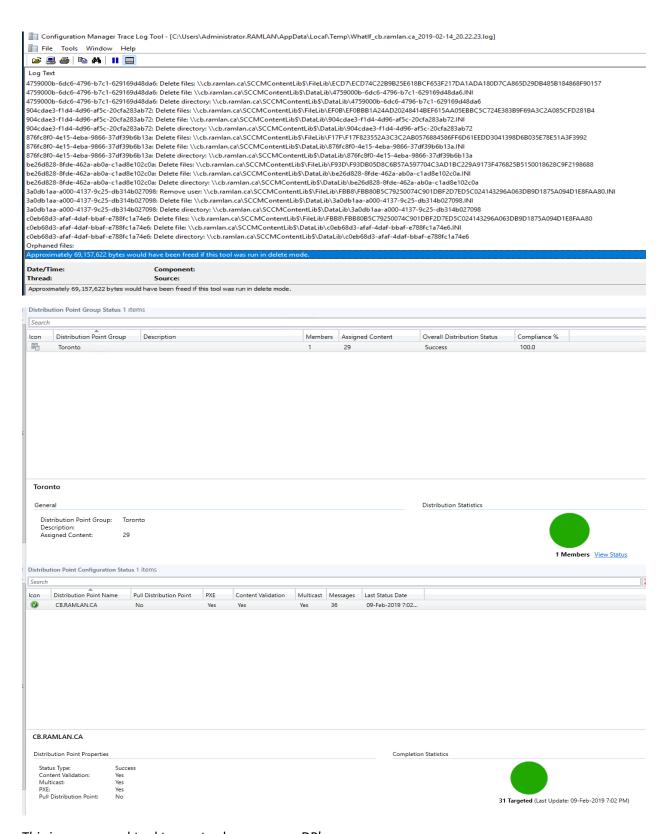

The tool is located here.

CB > OS (C:) > Program Files > Microsoft Configuration Manager > cd.latest > SMSSETUP > TOOLS >

Name	Date modified	Type	Size
ClientTools	06-Jan-2019 6:23 P...	File folder

CMTrace.exe	13-Dec-2018 3:14 ...	Application	725 KB

You can run the tool from here (See Screen shot). You can run in WHATIF and DELETE mode. My screen shot show first in WHATIF mode. It reported 69,157,622 bytes can be freed.

Administrator: Command Prompt

```
Microsoft Windows [Version 10.0.17763.292]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\Administrator.RAMLAN>cd "C:\Program Files\Microsoft Configuration Manager\cd.latest\SMSSETUP\TOOLS\ContentLibraryCleanup"

C:\Program Files\Microsoft Configuration Manager\cd.latest\SMSSETUP\TOOLS\ContentLibraryCleanup>ContentLibraryCleanup.exe /dp cb.ramlan.ca
This tool should be run with care. It is critical that this tool be run as a user with administrative access to the distribution point and with the "Full Administrator" RBAC role and "All" scope. If you are running the tool remotely, please ensure your network is secure. The tool is running in What-If mode and will not alter the content library.
Are you sure you want to proceed (What-If mode)? 'y' = yes / 'n' = no :: y

Because this distribution point is co-located with its site server, packages may correctly exist in the content library
that are not distributed to the distribution point. Package deletion has been disabled.
The following contents may be orphaned. They are not part of any package--the package may have been deleted on the site
server:
Delete 335fc544-8866-4f88-a590-4d2b0204fe69: 'y' = yes / 'n' = no / 'a' = yes to all / 's' = skip all :: a
