

Installing KB4538488 on Current Branch 1910

In this post, I will show you the steps for installing above. The kb was released on 22nd Jan 2020 to fix these issues.

<https://support.microsoft.com/help/4538488>

Clients immediately upgrade after updating to Configuration Manager current branch, version 1910

Applies to: Microsoft Endpoint Configuration Manager (current branch - version 1910)

Symptoms

If your site uses automatic client upgrade, when you update the site to Microsoft Endpoint Configuration Manager current branch, version 1910, all clients immediately upgrade after the site updates successfully. The only randomization is when clients receive the policy, which by default is every hour. For a large site with many clients, this behavior can consume a significant amount of network traffic and stress distribution points.

Note: This issue is already resolved in the revised version of Configuration Manager version 1910 released on January 17, 2020.

Update information for Microsoft Endpoint Configuration Manager current branch, version 1910

This update is applicable only to early update and globally available installations of Configuration Manager, version 1910 that are installed by using one of the following package GUIDs:

0BB82139-0DC3-4B18-B219-97FB2EFD9E56
E2F7B2F9-4828-4650-9144-5DC7956781B7

It is also applicable to the following package GUID's with the private TAP rollout, or update KB [4535819](#) applied:

3B4824FF-02FC-40B8-95AB-2AE986B0B63F
