

Installing KB4537079 – Current Branch 1910

In this post, I will show you the steps for installing above KB. You can visit below link for more information about the update.

<https://support.microsoft.com/help/4537079>

Issues that are fixed

- The Configuration Manager console may terminate unexpectedly when viewing the properties of a third-party software updates catalog.
 - Local policy instances are not copied to Actual (current) policy on clients if there are no policies downloaded from the site server.
 - Distribution Points incorrect display a failed status for deployment packages. This occurs if the Distribution Point is removed from a Distribution Point group while it is in maintenance mode.
 - The SCCMPXE service consumes more memory than expected after updating to Configuration Manager version 1910.
 - The Create Cloud Management Gateway Wizard only displays the first 50 Subscription ID's for a given account. Any subscriptions beyond the first 50 are not available for use in the wizard.
 - Powershell.exe terminates unexpectedly when importing modules using the Connect via PowerShell option in the Configuration Manager console.
 - The BitLocker drive status shows as non-compliant when the drive is encrypted. This occurs when using Microsoft BitLocker Administration and Monitoring (MBAM) policies and the policies are set to disabled or not configured.
 - Clients within the boundaries of a secondary site repeatedly send registration requests until the secondary site server is restarted. After a client is successfully registered, a message resembling the following is recorded in the ClientIDManagerStartup.log file, indicating that the client will register again.
- [RegTask] - Client is not registered. Sending registration request for GUID:(client_GUID) ...
- Personal view preferences for the Configuration Manager console are lost when connecting back to the console via a Remote Desktop session.

The screenshot shows the Configuration Manager console interface. At the top, there is a toolbar with icons for 'Saved Searches', 'Install Update Pack', 'Run prerequisite check', 'Retry installation', 'Ignore prerequisite warnings', 'Promote Pre-production Client', and 'Download'. Below the toolbar, the breadcrumb navigation shows 'Updates and Servicing'. The main area is titled 'Updates and Servicing 4 items' and contains a table of updates. An arrow points to the row for 'Configuration Manager 1910 Hotfix Rollup (KB4537079)'.

Name	Date Released	State	Prereq Only	Package Guid	Ignore Prereq Warning	Full Version	Client Version
Configuration Manager 1910 Hotfix Rollup (KB4537079)	10-Feb-2020 12:00 AM	Installed	No	63478508-BF04-488F-AA4B-2B68CDAFA3E0	Yes	5.00.8913.1032	5.00.8913.1032

General Licensing Diagnostic and Usage Data Client Approval and Conflicting Records Authentication Client Upgrade

 Configure settings that control how clients automatically upgrade.

Production client version: 5.00.8913.1032
Last modified: 19-Feb-2020 7:21:46 AM

Upgrade all clients in the hierarchy using production client
 Do not upgrade servers

Automatically upgrade clients within days: 1

Pre-production client version: 5.00.8913.1032
Last modified: 19-Feb-2020 7:21:25 AM

Upgrade all clients in the pre-production collection automatically using pre-production client

Pre-production collection :

You can promote the pre-production client from Monitoring > Client Status > Pre-production Client Deployment.

Exclude specified clients from upgrade

Exclusion collection :

These clients will not be upgraded via any method such as automatic upgrade or software update-based upgrade.

Client deployment status can be monitored in console and using reports.

 Applied to Windows operating systems only. You can download clients for additional operating systems from the [Microsoft Download Center](#).

Automatically distribute client installation package to distribution points that are enabled for prestaged content

This concludes the KB install process.

Thanks
