# How to install Microsoft Teams

Microsoft announced that Skype for Business end of support coming by July 31, 2021. So, most of the organizations are started the migrations to MS teams. SCCM gives admins an easy option to deploy the application to Windows 10 devices.

You can download Teams for FREE from here - https://docs.microsoft.com/en-us/MicrosoftTeams/msi-deployment

I will show you how to create an application and deploy to All Systems collection. I have downloaded the file including picture of Teams icon for later use.
