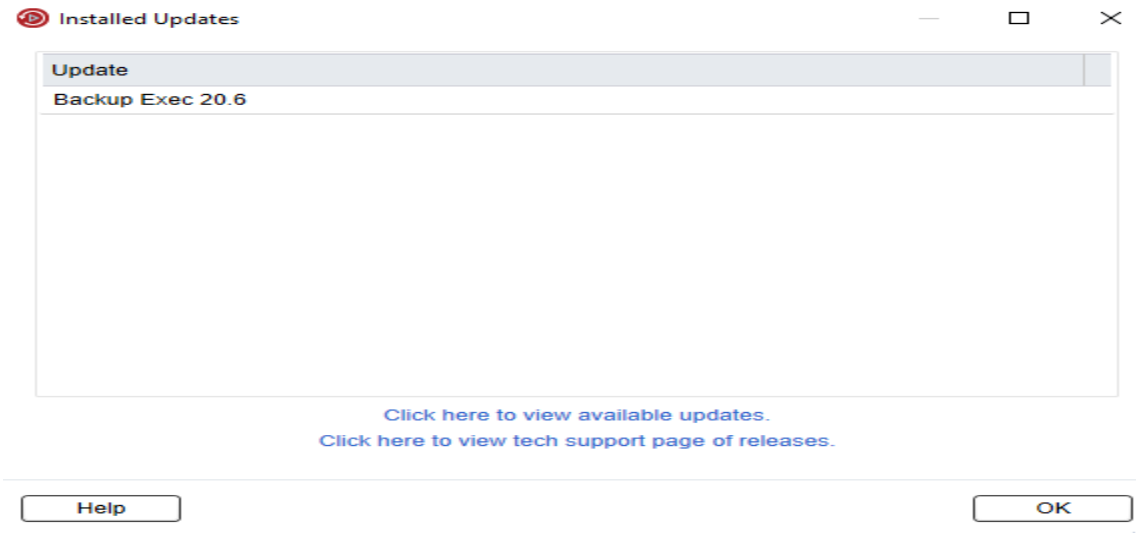
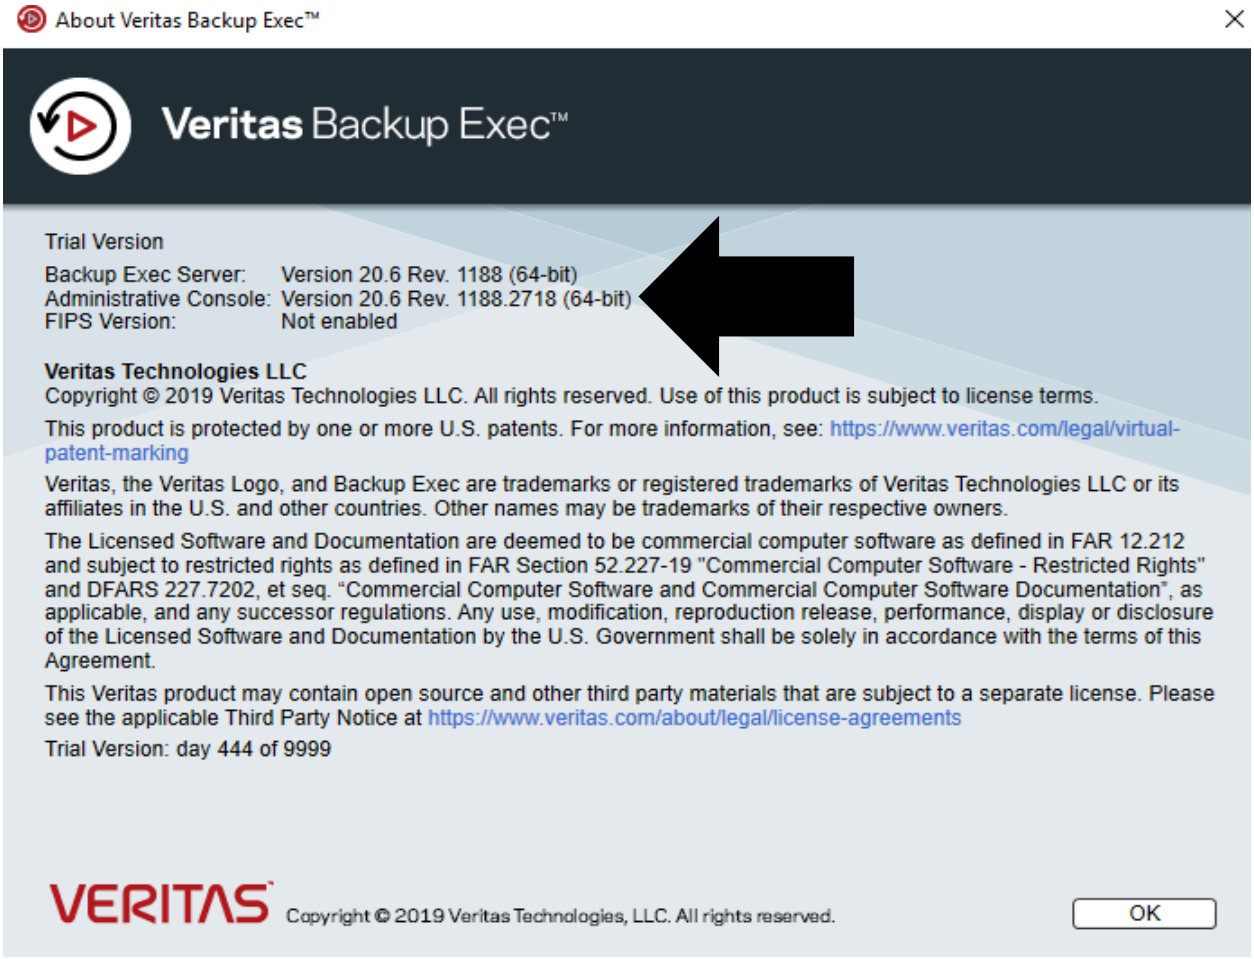
What's New in this version of Backup Exec

Item	Description
Backup Exec Accelerator	Backup Exec supports forever incremental backups for VMware and Hyper-V virtual machines. It eliminates the need to do frequent full backups of the source virtual machines by creating consolidated full backup sets on the Backup Exec server.
Support for new cloud storage regions	Backup Exec users benefit from cloud storage choices through support for the following cloud storage regions, enabling greater flexibility and economy: ■ Amazon: Bahrain ■ Azure: UAE - North Review the Backup Exec Hardware Compatibility List (HCL) for supported cloud storage regions. You can find the HCL at the following URL: http://www.veritas.com/docs/000017788

Don't show again. To access this dialog, click the Backup Exec button, select Help and Documentation, and then select What's New.

Close





This concludes Veritas backup exec upgrade.

Thanks
