

Changing Default Desktop Icon Name in Azure Portal WVD

In continuation to Part 4, In this I want to change the name of Default Desktop icon when user login to virtual desktop. Here is what user see when they login to WVD.

I am going to change this to RAMLAN INC Desktop. This is what you have to do

Windows Virtual Desktop – Application Groups – Desktop Pool – Properties – Configuration – Friendly Name

Now the name makes sense and this will be reflected in next login session.

Thanks
