Client update settings

This update includes an update for the Configuration Manager client. You can upgrade your clients immediately, or validate this client in a pre-production collection before you upgrade all your Configuration Manager clients.

Upgrade without validating

Overwrites your current Configuration Manager client package with the new client update. All new client installations and client upgrades use this new client update.

Validate in pre-production collection

Validate the client update on members of the pre-production collection while you keep your production client package intact. Later, you can overwrite the production package using Client Update Options in the Updates and Servicing node of the Configuration Manager console.

Pre-production collection:

General Licensing Diagnostic and Usage Data Client Approval and Conflicting Records Authentication Client Upgrade

 Configure settings that control how clients automatically upgrade.

Production client version: 5.00.9058.1047
Last modified: 03-Nov-2021 10:38:58 AM

Upgrade all clients in the hierarchy using production client
 Do not upgrade servers

Automatically upgrade clients within days:

Pre-production client version: 5.00.9058.1047
Last modified: 03-Nov-2021 10:38:16 AM

Upgrade all clients in the pre-production collection automatically using pre-production client

Pre-production collection :

You can promote the pre-production client from Monitoring > Client Status > Pre-production Client Deployment.

Exclude specified clients from upgrade

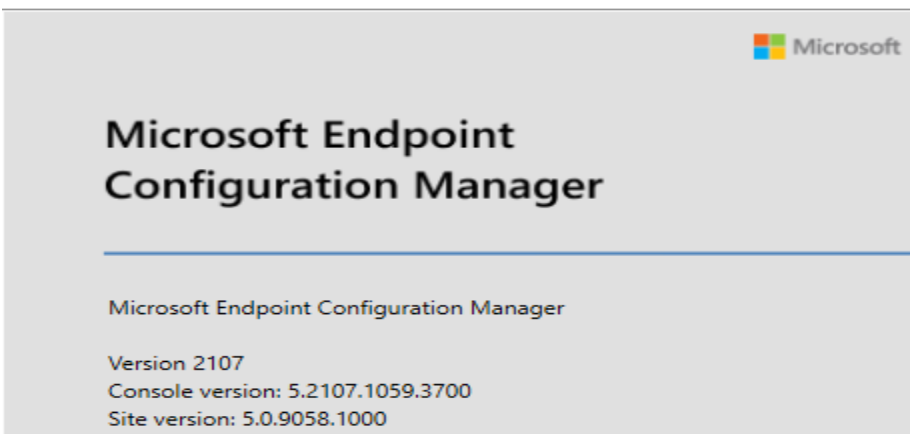

Exclusion collection :

These clients will not be upgraded by automatic upgrade or software-based upgrade

Client deployment status can be monitored in console and using reports.

 Applied to Windows operating systems only. You can download clients for additional operating systems from the [Microsoft Download Center](#).

Automatically distribute client installation package to distribution points that are enabled for prestaged content

This concludes above KB install.

Thanks

Ram
