

Installing Update Pack KB14244456

In this post, I am going to install above KB for Current Branch 2203 released this month. This update covers the following.

<https://docs.microsoft.com/en-us/mem/configmgr/hotfix/2203/14244456>

Update rollup for Microsoft Endpoint Configuration Manager version 2203

Article • 06/24/2022 • 4 minutes to read • 1 contributor

Applies to: Configuration Manager (current branch, version 2203)

Summary of KB14244456

This article describes issues that are fixed in this update rollup for Microsoft Endpoint Configuration Manager current branch, version 2203. This update applies both to customers who opted in through a PowerShell script to the early update ring deployment, and customers who installed the globally available release. For more information on changes in Configuration Manager version 2203, see:

- [What's new in version 2203 of Configuration Manager current branch](#)
- [Summary of changes in Microsoft Endpoint Configuration Manager current branch, version 2203](#)

Issues that are fixed

- Application approvals through email don't work with a cloud management gateway due to a missing Azure Active Directory token.
- Metadata revisions to previously published metadata-only updates aren't synchronized to Windows Server Update Services (WSUS) as expected.
- The Task Sequence Editor running on Windows Server 2022 fails to apply changes to a task sequence if the window is left open for several minutes. When this occurs the following message is displayed onscreen.

text

Copy

```
Error connecting to provider, smsprov.log may show more details.
```

- BitLocker compliance status won't be accurate for a brief period of time if the **Client checking status frequency (minutes)** value is set below 60.
- The SMS_AZUREAD_DISCOVERY_AGENT thread of the SMS_Executive service incorrectly removes some users and their group memberships when the site server is configured with a non-US English locale. The removal happens when the discovery cycle runs after the 12th day of the month. Errors resembling the following are recorded in the SMS_AZUREAD_DISCOVERY_AGENT.log file at different times during the discovery cycle.

```
text Copy
ERROR: Encountered SqlException The conversion of a nvarchar data type to a datetime data type resulted in an
ERROR: Exception message: [The conversion of a nvarchar data type to a datetime data type resulted in an
ERROR: Group full sync request failed. Exception: System.NullReferenceException: Object reference not set
```

- When adding a CMPivot query as a favorite it is split into two lines and characters are removed.
- The *Name* criteria isn't available when searching Software Update Groups in the Configuration Manager console.
- The *Browse* button for **Content location** in the properties for a deployment returns an empty location instead of the value previously shown.
- An application that is targeted to a device collection but deployed in the context of the user won't honor the implicit uninstall setting.
- Typing a *Name* value in the **Create Orchestration Group** wizard is unexpectedly slow.
- A misleading error message (false negative) is generated on a target distribution point that is co-located with a site server. This happens during content distribution from a parent site to a child site. The misleading error in distmgr.log resembles this entry:

```
text Copy
~RDC:Failed to set access security on \\<SiteServerFQDN>\SMSSIG$\<PkgID>.1.tar for package <PkgID> signat
```

Hotfixes that are included in this update

- KB [13953025](#) Update for Microsoft Endpoint Configuration Manager version 2203, early update ring
- KB [14480034](#) Registration fails for PKI clients after updating to Configuration Manager current branch, version 2203

Update information for Microsoft Endpoint Configuration Manager current branch, version 2203

This update is available in the Updates and Servicing node of the Configuration Manager console for environments that were installed by using early update ring or globally available builds of version 2203.

Members of the Configuration Manager Technology Adoption Program (TAP) must first apply the private TAP rollup before this update is displayed.

To verify which build is in use, look for a Package GUID by adding the Package GUID column to the details pane of the Updates and Servicing node in the console. The update applies to installations from packages that have the following GUIDs:

- 08AA4546-8F69-4F42-9C24-5A022ECEEB87
- 56DB32EE-4377-460E-BB19-5095FBCFBE1D
- 26D18D89-CDCA-4499-ACCC-9029E60D6C66
- 89735386-930A-490A-909B-65101BA8C02C

The update is also applicable to TAP builds with the private TAP rollup ([40CA6011-70E7-49DF-A05F-5400C85B971A](#)) installed. New installations from 2203 media, as opposed to updates from prior versions, will not have any package GUIDs listed.

Restart information

This update doesn't require a computer restart but will initiate a [site reset](#) after installation.

I was getting download failed for the update. Restarted the system and tried and now it is ready for install.

The screenshot shows the Configuration Manager console with the 'Updates and Servicing' workspace. The 'Updates and Servicing' node is expanded, showing a table of updates. The first update, 'Configuration Manager 2203 Hotfix Rollup (KB14244456)', has a state of 'Download failed'.

Client update settings

This update includes an update for the Configuration Manager client. You can upgrade your clients immediately, or validate this client in a pre-production collection before you upgrade all your Configuration Manager clients.

- Upgrade without validating
Overwrites your current Configuration Manager client package with the new client update. All new client installations and client upgrades use this new client update.
- Validate in pre-production collection
Validate the client update on members of the pre-production collection while you keep your production client package intact. Later, you can overwrite the production package using Client Update Options in the Updates and Servicing node of the Configuration Manager console.

Pre-production collection:
