

## TurboTax 2022 Troubleshooting Fix after performing updates

I was getting lot of emails from people complaining program is not working and it is asking for activation code after performing the update. I performed test at home today and below are the fix.

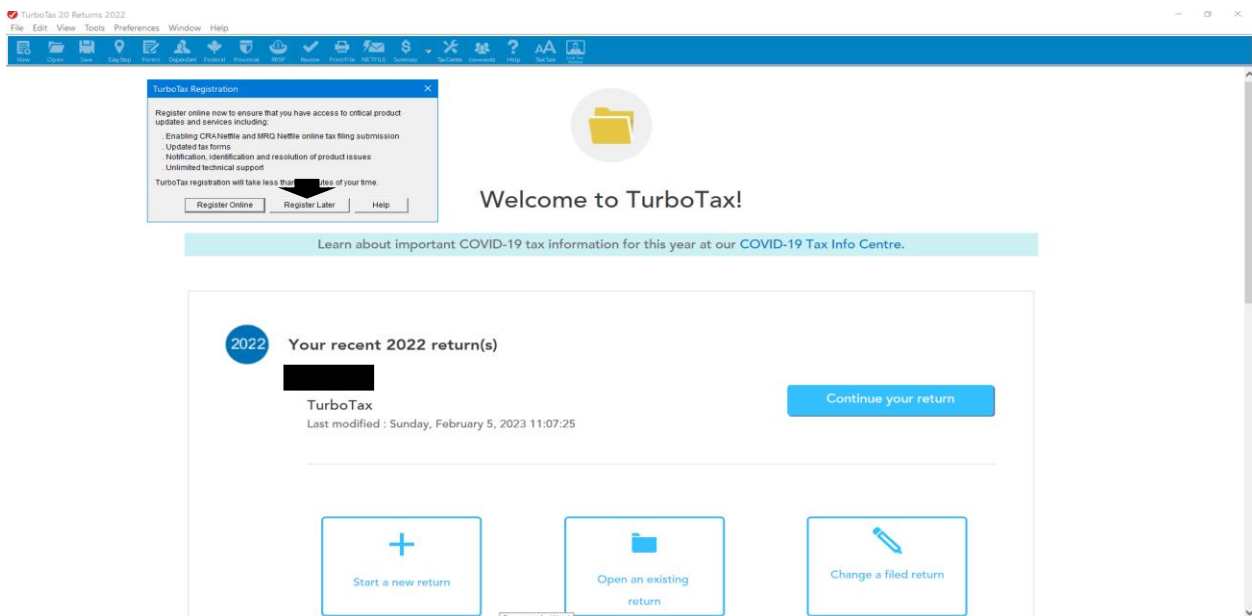

First, I disconnected internet.

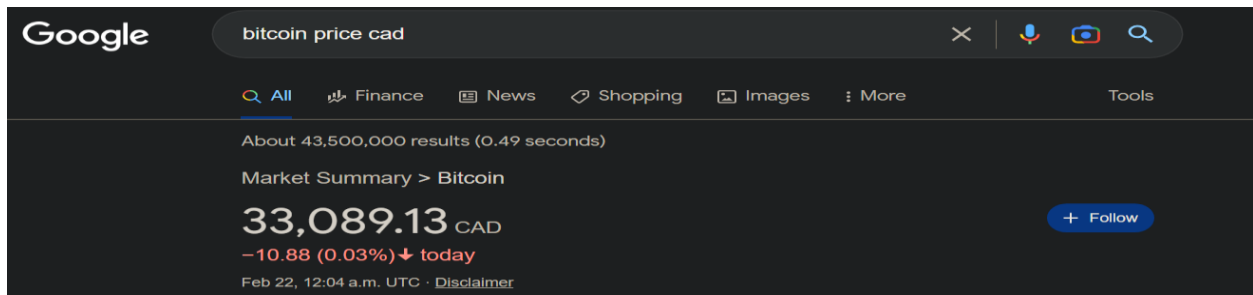

Open TurboTax 2022 program. Click No to below message

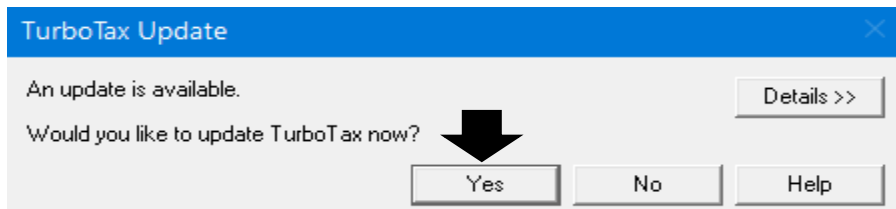

Now TurboTax 2022 opened and I am still without internet.

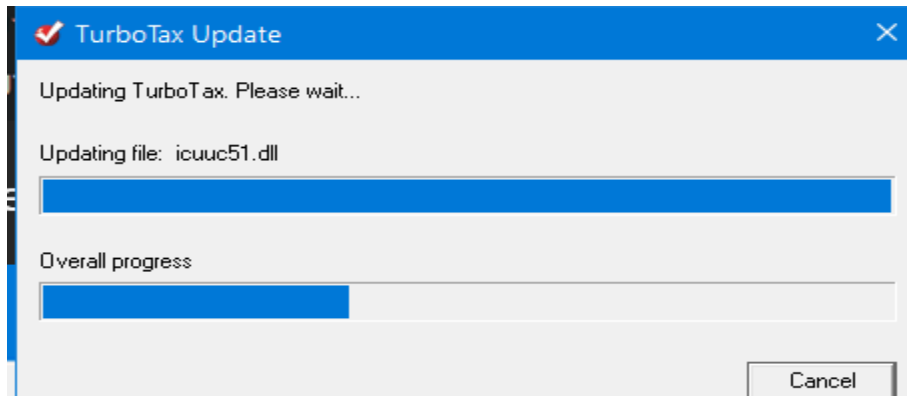

Now internet is connected. Will perform check for update.

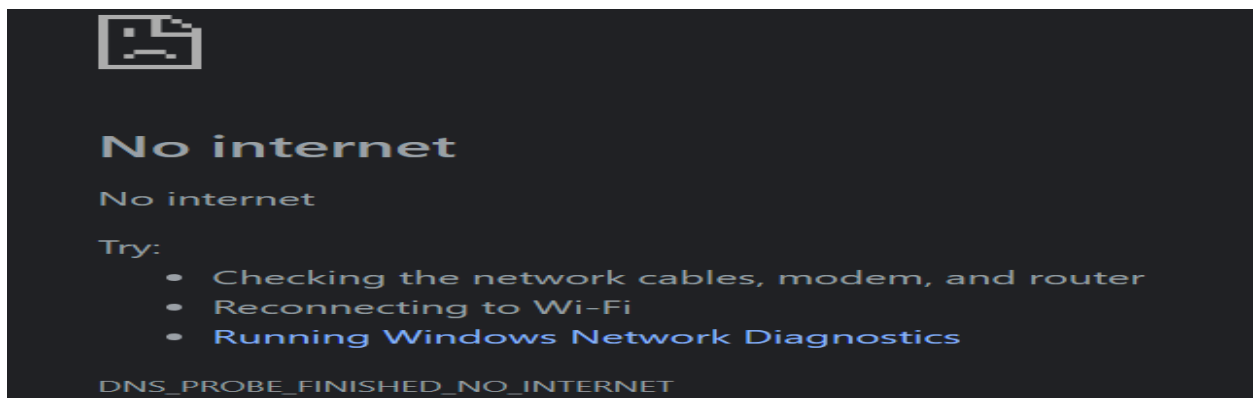

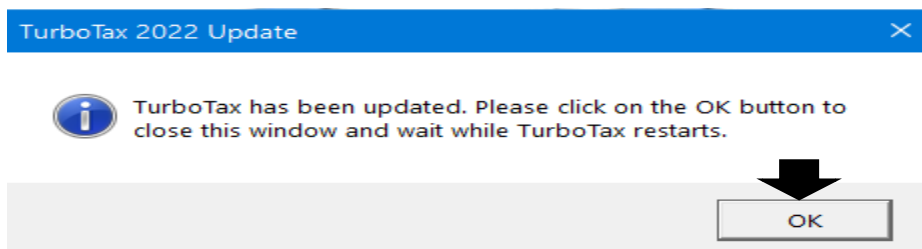

Now performed check for updates. Update are available

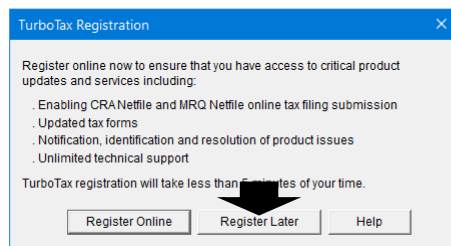

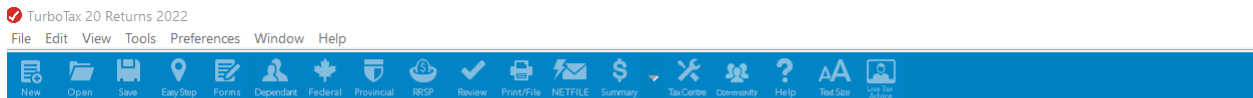

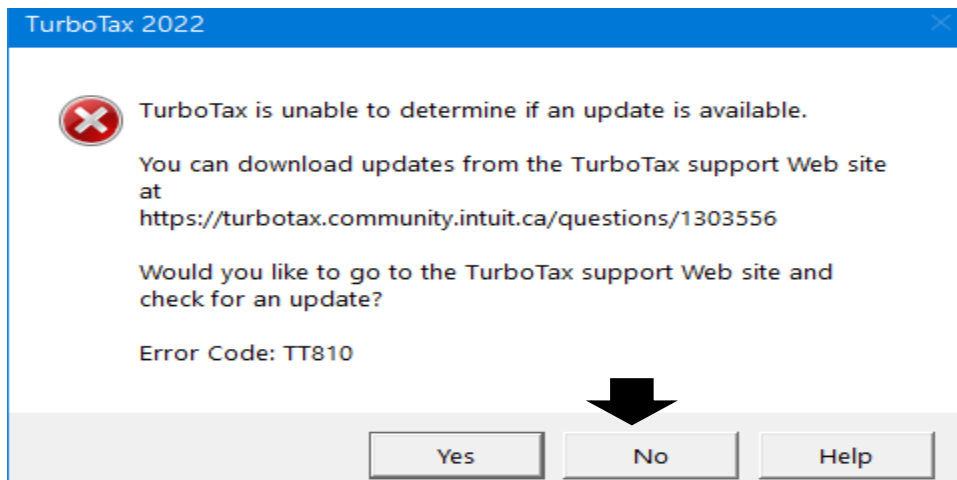

Updates are installing.

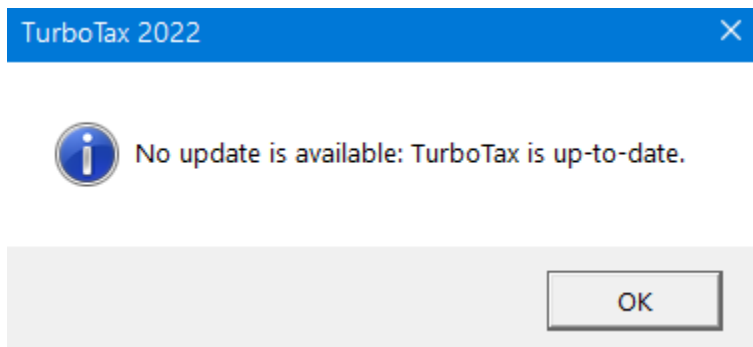

Now TurboTax 2022 is asking to restart the program. Before you press OK please disconnect internet – we don't want to have internet when we open TurboTax 2022 program. After program loads, we can connect to internet and complete our task.

Welcome to TurboTax!

Now connect to internet and perform check for update. As you can see the program is up to date.

If you follow above steps properly you will have TurboTax 2022 activated at all the time. Just make sure always disconnect internet before you open TurboTax 2022 program. After the program finished loading connect to internet. That simple...

Thanks
