

How to install or upgrade PowerShell version 7

I am running PS Version 7.3.6. MS released version 7.3.7 on 18th Sep. I am going to show you two ways to upgrade.

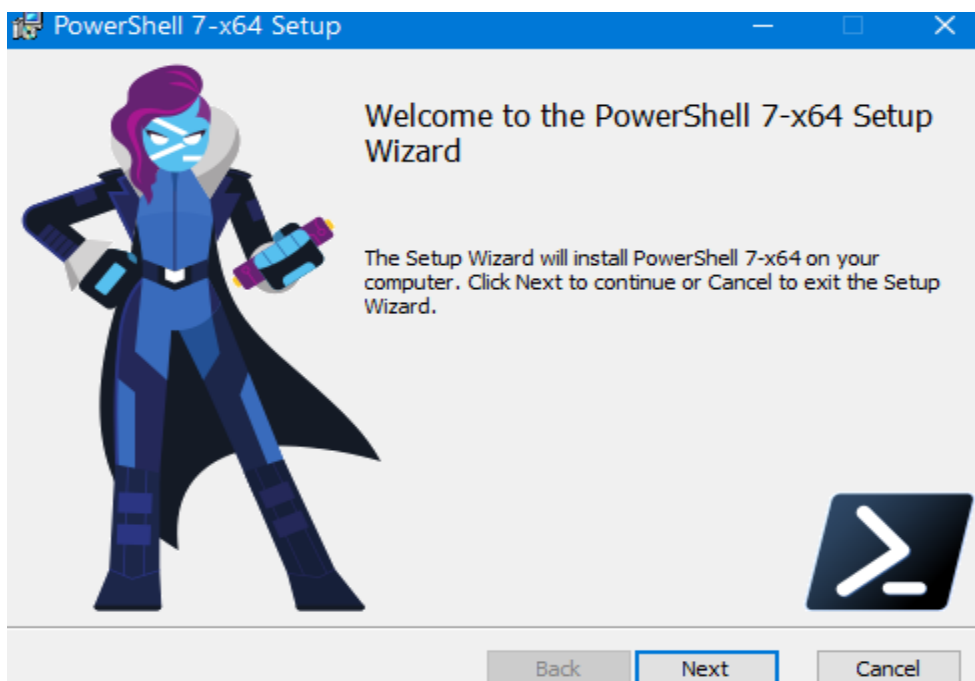

1. Will run MSI installer and complete the upgrade.
2. Will use WinGet command to upgrade.

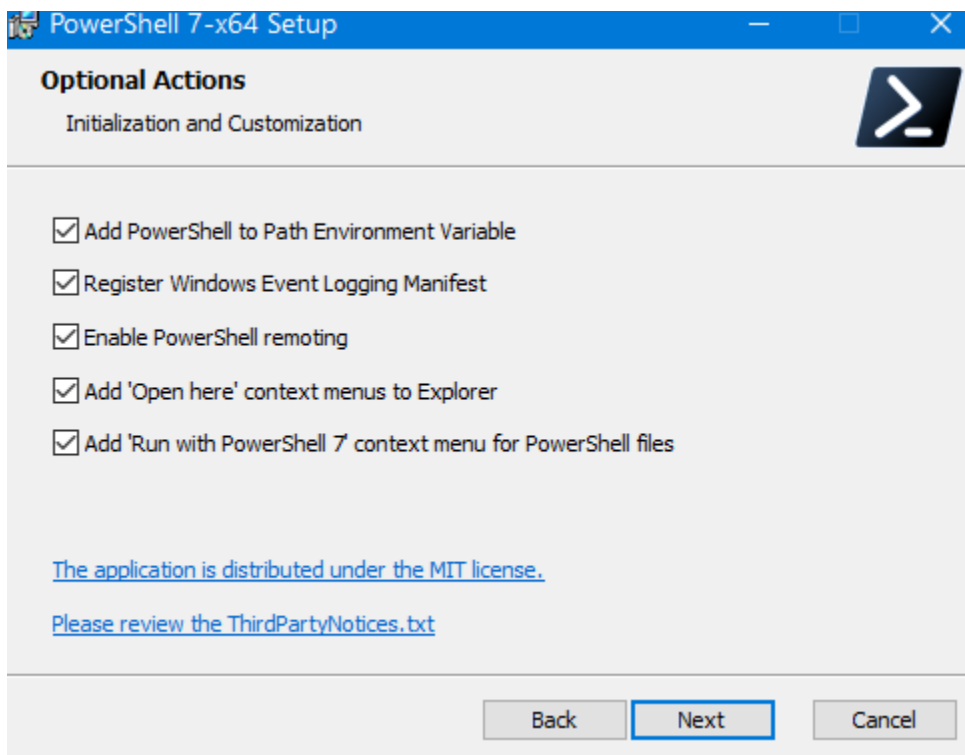

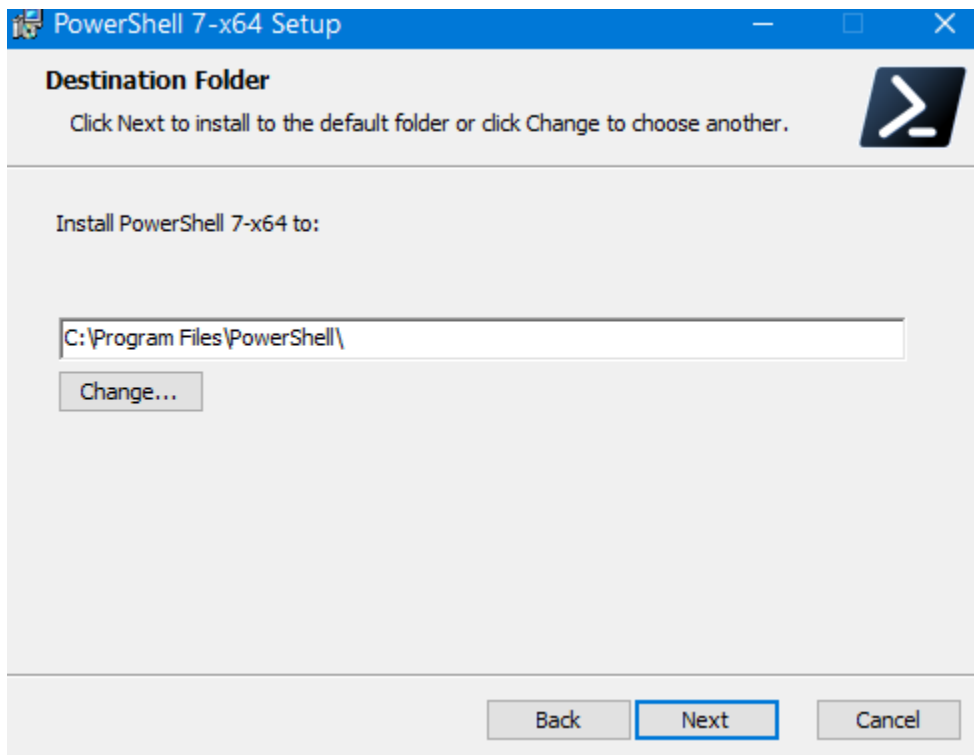

You can download latest version from <https://github.com/PowerShell/PowerShell/releases/tag/v7.3.7>

```
Administrator: PowerShell 7 (x64)
PowerShell 7.3.6
A new PowerShell stable release is available: v7.3.7
Upgrade now, or check out the release page at:
https://aka.ms/PowerShell-Release?tag=v7.3.7
PS C:\Users\Administrator> $PSVersionTable

PowerShell 7-x64 Setup

Use Microsoft Update to help keep your computer secure and up to date

Microsoft Update helps keep your computer secure and up to date for Windows and other Microsoft products, including PowerShell 7. Updates will be delivered based on your current update settings. You can review or change these settings from the Windows Update control panel.

- Enable updating PowerShell through Microsoft Update or WSUS (recommended)
- Use Microsoft Update when I check for updates (recommended)
