How to install KB26129847 for Current Branch 2309

In this post, I am going to install above KB to fix Client Discovery data. This KB was released last month applicable only for CB2309.
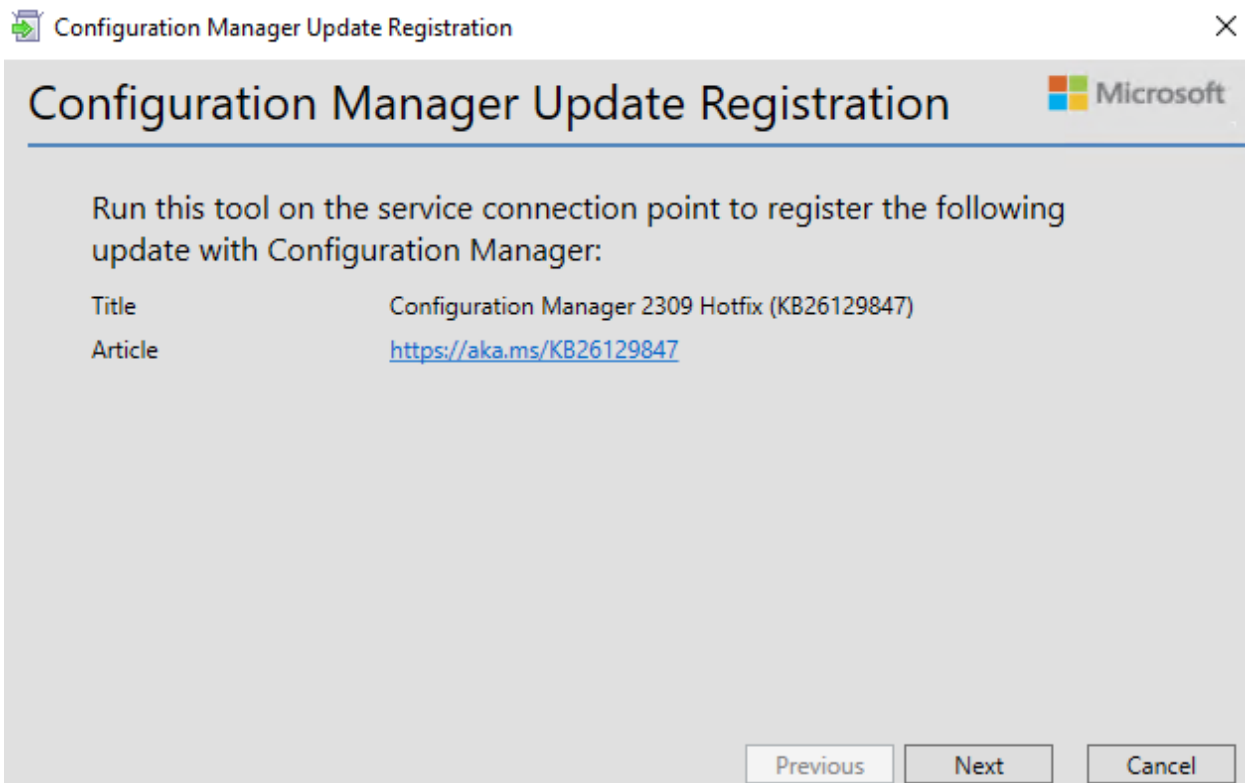

You can download the KB update file from here - https://aka.ms/KB26129847_Payload
I am going to run the exe from command prompt.

Import KB26129847 using Update Registration Tool

Any out-of-band update requires administrators to manually import it into the console. Follow the below procedure to import hotfix KB 26129847 into ConfigMgr using the update registration tool:

- Log in to the server that hosts the service connection point role.
- Launch the command prompt as an administrator. Change the path to the folder that contains the hotfix setup.
- Run the command **CM2309-KB26129847.ConfigMgr.Update.exe** to start the update registration tool.
- The update registration tool extracts the update package from the site server.

Configuration Manager Update Registration

Configuration Manager Update Registration   ■■ Microsoft

Run this tool on the service connection point to register the following update with Configuration Manager:

Title	Configuration Manager 2309 Hotfix (KB26129847)
Article	https://aka.ms/KB26129847

Previous   Next   Cancel

Wait for the update to show up in the console – Administration –> Updates and Servicing

Client update settings

This update includes an update for the Configuration Manager client. You can upgrade your clients immediately, or validate this client in a pre-production collection before you upgrade all your Configuration Manager clients.

◉ Upgrade without validating

    Overwrites your current Configuration Manager client package with the new client update. All new client installations and client upgrades use this new client update.

○ Validate in pre-production collection

    Validate the client update on members of the pre-production collection while you keep your production client package intact. Later, you can overwrite the production package using Client Update Options in the Updates and Servicing node of the Configuration Manager console.

Pre-production collection:

Configuration Manager 2309 Hotfix (KB26129847)	13-Dec-2023 12:00 AM	Installing	No	Yes	5.00.9122.1007	5.00.9122.1007	09-Jan-2024 10:46 AM

Wait for the install to complete. No need to restart the server.

This update fix the following:

Summary of KB26129847

An update is available that fixes a discovery data issue with Configuration Manager clients.

Co-managed clients incorrectly send a discovery data record (DDR) after the computer or the SMS Agent Host service (CCMExe.exe) restarts. In larger environments, this leads to a backlog of DDRs to be processed.

Update information for Microsoft Configuration Manager

The following hotfix to resolve this problem is available for download from the Microsoft Download Center:

KB26129847 🗗

After you download the hotfix, see the following documentation for installation instructions:

Use the Update Registration Tool to import hotfixes to Configuration Manager

Prerequisites

To apply this hotfix, you must be using Configuration Manager, version 2309.

Thanks
